I am new to XM radio, but honestly believe that it is far superior to old radio (AM and FM) and prefer it not only about both of those but even above listening to my own CD's. When given to chance to put a CD player in my car, I chose to get just an XM unit because of the variety they offered alone. I pay monthly for my usage of XM and due to that, I should be able to get whatever they want to put on my radio. I could understand the government blocking something that I'm not paying for anyway, but this radio is my choice, I pay to hear, and no one should be able to change that. That instant traffic and weather on XM comes in very handy because it is always available and keeps you up to date constantly. Old radio makes you wait for certain times to hear and even then, it's not about the areas you wanted to hear about. Please, leave our XM alone and worry about the more important things like what are kids are watching on Television.
